	If eye irritation persists: Get medical advice.
IF SWALLOWED	P301 + P330, P331
Immediate Symptoms	nausea, sore throat, diarrhea, drowsiness, dizziness, vomiting
Response	Rinse mouth. Do NOT induce vomiting.

Section 5: Fire-Fighting Measures

Extinguishing Media In case of fire: Use dry chemical, carbon dioxide, chemical

foam, or water spray to extinguish.

Specific Hazards The liquid may float on water and ignite.

The vapors are heavier than air and may accumulate in lowlying areas. Vapors may travel long distances and ignite at an ignition source, which can cause a flashback or an explosion.

Combustion Products Produces carbon oxides (CO, CO₂).

Fire-Fighter Wear self-contained breathing apparatus and full fire-fighting

turn-out gear.

Section 6: Accidental Release Measures

Personal Protection See personal protection recommendations in Section 8.

Precautions for Response

Avoid breathing the vapors. Remove or keep away all sources

of extreme heat or open flames.

Environmental Precautions

Avoid releasing to the environment. Prevent spill from entering

drains and waterways.

Containment Not applicable

Cleaning Collect liquid in a sealable, solvent-resistant container. Wipe the

residues with a paper towel and place dirty towels in container. Wash spill area with soap and water to remove the last traces

of residue.

Disposal Dispose of spill waste according to Section 13.

Section 7: Handling and Storage

Prevention Keep out of reach of children.

Keep away from heat, hot surfaces, sparks, open flames and

other ignition sources. No smoking.

Keep container tightly closed. Avoid breathing vapors. Use only

outdoors or in a well-ventilated area.

Handling Wear protective gloves and eye protection.

Take off contaminated clothing and wash it before reuse. Contaminated work clothing should not be allowed out of the

workplace.

Wash hands thoroughly after handling.

Avoid release to the environment.

Storage Store in well-ventilated place. Keep cool.

Store locked up.

- a) Respirable airborne particles
- b) Sensitizer (S)

Engineering Controls

Ventilation

Keep airborne concentrations below the occupational exposure limits (OEL).

Because the titanium dioxide is bound to the liquid mixture, it does not present an airborne hazard under normal use. Ensure adequate ventilation if the product is mechanically misted or aerosolized.

Personal Protective Equipment

Eye protection Wear appropriate protective eyeglasses or chemical safety

goggles.

RECOMMENDATION: Use safety glasses with lateral protection

(side shields).

Skin Protection For likely contacts, use of protective butyl rubber, neoprene,

or other chemically resistant gloves.

For incidental contacts, use nitrile, polyvinyl alcohol (PVA) or

other chemically resistant gloves.

Respiratory Protection For over-exposures up to 10 x OEL of vapors, wear respirator

such as a half-mask respirator with organic vapor cartridges.

Above 10 x OEL, use a positive-pressure, air-supplied respirator or a self-contained breathing apparatus.

RECOMMENDATION: Consult your local safety supply store to ensure that your respirator has a NIOSH (U.S.) approved filter cartridges appropriate for the ingredients listed in Section 3.

The respirator should be fitted to the employee by a

professional. Ensure vapor cartridges are stored in sealed

plastic bags when not being used.

General Hygiene Considerations

Wash hands thoroughly with water and soap after handling.

Section 11: Toxicological Information

Summary of Effects and Symptoms by Routes of Exposure

Eyes Causes redness, severe irritation, or pain.

Skin Causes skin redness, irritation, dry skin, and rashes.

Inhalation May cause dizziness, drowsiness, cough, headaches, or nausea.

Ingestion May cause nausea, sore throat, diarrhea, or vomiting.

Chronic Prolonged or repeated exposure may cause skin dryness, cracking,

as well as defatting the skin. May also cause skin allergies.

Other	Toxico	logical	Effects
-------	---------------	---------	----------------

Skin corrosion/irritation Based on available data, the classification criteria are

not met.

Serious eye damage/irritation Butan-2-one is a known serious eye irritant.

Sensitization

The methyl methacrylate and n-butyl methacrylate may (allergic reactions) cause skin sensitization according to animal studies.

Carcinogenicity Because the titanium dioxide is bound in the liquid (risk of cancer)

mixture, it is not available as an airborne hazard (dust)

under normal use.

Titanium Dioxide [13463-67-7]

IARC Group 2B: Possibly carcinogenic to humans

ACGIH A4: Not classified as a human carcinogen

CA Prop 65: Listed as a carcinogen (airborne, as

unbound particles of respirable size)

NTP: Not listed

Mutagenicity Based on available data, the classification criteria are

not met.

Reproductive Toxicity (risk to

(risk of heritable genetic effects)

sex functions)

Based on available data, the classification criteria are

not met.

Teratogenicity

(risk of fetus malformation)

Based on available data, the classification criteria are

not met.

STOT-single exposure The n-butyl acetate, butan-2-one, methyl methacrylate,

and n-butyl methacrylate components can affect the

central nervous system by inhalation causing

drowsiness or dizziness.

STOT-repeated exposure Based on available data, the classification criteria are

not met.

Aspiration hazard Based on available data, the classification criteria are

> not met. Contains less than 10% components of category 1, and the mixture has a kinematic viscosity

of >20.5 mm²/s at 40 °C.

Section 12: Ecological Information

Ecological classifications are based on the IMDG/GHS criteria in conjunction with ecotoxicological data from our suppliers, the European Chemical Agency database (http://echa.europa.eu), and other reliable sources.

The n-butyl acetate ingredient is an acute category 3 environmental toxicant (biodegradable, with minimal LC50 of 18 mg/L for fathead minnow).

The 2-butanone (MEK) ingredient is not classified as an environmental hazard according to GHS criteria.

The 1-methoxy-2-propanol acetate component is an acute category 3 environmental toxicant (with minimal LC50 96 h of ≥100 mg/L Salmo gairdneri).

Based on available data, titanium dioxide is not classified as environmental hazards according to GHS criteria.

Acute Ecotoxicity

Category 3

Harmful to aquatic life

Avoid release to the environment.

Chronic Ecotoxicity

Available toxicity data does not meet classification thresholds.

Biodegradability

Expected to be biodegradable. The volatile solvent constituents will oxidize rapidly in air by photochemical reaction.

Other Effects

Regulated Volatile Organic Compounds (VOC) content according to the US (EPA) and Canadian (CEPA) authorities.

VOC = 73% [678 g/L]

Section 13: Disposal Information

Dispose of contents in accordance with all local, regional, national, and international regulations.
