P304 + P340

Immediate Symptoms*low toxicity—cough, irritation of the respiratory track, sore throat***Response**

Remove person to fresh air and keep comfortable for breathing.

Section 5: Fire-Fighting Measures**Extinguishing Media**

In case of fire: Use extinguishing media suitable for surrounding materials.

Specific Hazards

Not flammable or combustible, but burns if involved in a fire. Produces irritating smoke of unknown toxicity in fires.

Inhalation of zinc oxide and aluminum oxide fumes may cause metal fever and irritate the respiratory tract. The flu-like symptoms of metal fever may be delayed, occurring 4 to 12 hours after exposure.

Prevent fire-fighting wash from entering waterway or sewer system.

Combustion ProductsProduces carbon oxides (CO,CO₂) and toxic metal fumes.**Fire-Fighter**

Wear self-contained breathing apparatus and full fire-fighting turn-out gear.

Section 6: Accidental Release Measures**Personal Protection**

See personal protection recommendations in Section 8.

Precautions for Response

Avoid breathing the fumes or vapors. Remove or keep away all sources of extreme heat or open flames.

Environmental Precautions

Avoid releasing to the environment. Prevent spill from entering drains and waterways.

Containment Methods

Contain with inert and non-flammable absorbent (such as soil, sand, vermiculite).

Cleaning Methods

Collect liquid in a sealable, chemical-resistant container. Wash residue with a paper towel and place dirty towels in container. Use soap and water to remove the last traces of residue.

Disposal Methods

Dispose of spill waste according to Section 13.

Section 7: Handling and Storage
Prevention

Keep out of reach of children.

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood.

Avoid breathing fumes or vapors.

Contaminated work clothing should not be allowed out of the workplace.

Avoid release to the environment.

Handling

a) Respirable airborne particles.

Engineering Controls

Ventilation

Keep airborne concentrations below the occupational exposure limits (OEL).

Because the aluminum oxide, aluminium metal compounds, as well as the carbon black are inextricably bound to the adhesive mixture, they are not available as airborne hazards under normal use. Ensure adequate ventilation if the product is mechanically misted or aerosolized.

Personal Protective Equipment

Eye protection

Wear appropriate protective eyeglasses or chemical safety goggles.

RECOMMENDATION: Ensure that glasses have side shields for lateral protection.

Skin Protection

For likely contacts, use of protective butyl rubber, neoprene, or other chemically resistant gloves.

For incidental contacts, use nitrile, latex, neoprene or other chemically resistant gloves.

8349TFM-A
(PART A)

Respiratory Protection If exposed to fumes or dust above the exposure limit, wear a suitable respirator meeting local, regional, and national guidelines.

If the product is heated or worker has a known allergic reaction, consider using a full mask with organic vapor cartridge or with an independent air supply.

RECOMMENDATION: Consult your local safety supply store to ensure that your respirator has a NIOSH (U.S.) approved filter cartridges appropriate for the ingredients listed in Section 3. The respirator should be fitted to the employee by a professional. Ensure vapor cartridges are stored in sealed plastic bags when not being used.

General Hygiene Considerations

Wash hands thoroughly with water and soap after handling.

Avoid release to the environment. Collect spillage.

Biodegradability

Not readily biodegradable

Bioaccumulation

8349TFM-B**(PART B)****Section 5: Fire-Fighting Measures**

Extinguishing Media	Use extinguishing media suitable for surrounding materials. Possible suitable fire extinguishing media are dry chemical, carbon dioxide, chemical foam, or water spray.
Specific Hazards	Not flammable or combustible, but burns if involved in a fire. Produces irritating smoke of unknown toxicity in fires. Inhalation of aluminum oxide fumes may cause metal fever and irritate the respiratory tract. The flu-like symptoms of metal fever may be delayed, occurring 4 to 12 hours after exposure. Prevent fire-fighting wash from entering waterway or sewer system.
Combustion Products	Produces carbon oxides (CO, CO ₂), nitrogen oxides (NO _x), phosphorous oxides, ammonia, and toxic metal fumes.
Fire-Fighter	Wear self-contained breathing apparatus and full fire-fighting turn-out gear.

Section 6: Accidental Release Measures

Personal Protection	Use personal protection recommended in Section 8.
Precautions for Response	Avoid breathing fumes or vapors. Remove all sources of extreme heat or open flames.
Environmental Precautions	Avoid releasing to the environment. Prevent spill from entering drains and waterways. Do not flush to sewer.
Containment Methods	Not applicable—not readily flowable
Cleaning Methods	Collect the liquid in a chemically resistant and sealable container. Wipe off residue with a paper towel and place dirty towels in the container. Wash the spill area with soap and water to remove the last traces of residue. RECOMMENDATION: Use a plastic, stainless steel or carbon steel container. Avoid containers containing copper, aluminum, zinc or galvanized surfaces, as waste can slowly oxidize them.
Disposal Methods	Dispose spill waste according to Section 13.

8349TFM-B
(PART B)
Section 7: Handling and Storage

Prevention	Keep out of reach of children. Avoid breathing fumes or vapors. Contaminated work clothing should not be allowed out of the workplace.
Handling	Wear protective gloves and eye protection. Take off contaminated clothing and wash it before reuse. Wash hands and exposed skin thoroughly after handling.
Storage	RECOMMENDATION: Keep in a dry and clean area, away from incompatible substances

a) As respirable airborne particles.

Engineering Controls

Ventilation

Keep airborne concentrations below the occupational exposure limits (OEL).

Note that the aluminum oxide and carbon black powders are inextricably bound to the adhesive mixture; therefore, they are not available as airborne hazard under normal or foreseeable condition of use.

Personal Protective Equipment

Eye protection

Wear appropriate protective eyeglasses or chemical safety goggles.

RECOMMENDATION: Use safety glasses with lateral protection (side shields).

Skin Protection

For likely contacts, use of protective butyl rubber, neoprene, or other chemically resistant gloves.

For incidental contacts, use nitrile or other chemically resistant gloves.

8349TFM-B**(PART B)**

Respiratory Protection For over-exposures up to 10 x OEL of mist/vapors/spray, wear respirator such as a half-mask respirator with organic vapor cartridges. Dust particulate filters are not required.

Above 10 x OEL, use a positive-pressure, air-supplied respirator or a self-contained breathing apparatus.

If the product is heated or worker has a known allergic reaction, consider using a full mask with organic vapor cartridge or with an independent air supply.

RECOMMENDATION: Consult your local safety supply store to ensure that your respirator has a NIOSH (U.S.) approved filter cartridges appropriate for the ingredients listed in Section 3. The respirator should be fitted to the employee by a professional. Ensure vapor cartridges are stored in sealed plastic bags when not being used.

General Hygiene Considerations

Wash hands thoroughly with water and soap after handling.
